THE DIGITAL BACKBONE OF AGRICULTURE

NAFI

National Agri-Finance Infrastructure

A unified platform connecting diaspora investors, commercial banks, input suppliers, and commercial farmers through one smart-contract ledger — from capital commitment to farmer payout, in one automated cycle.

01 INVESTOR

02 FARMER

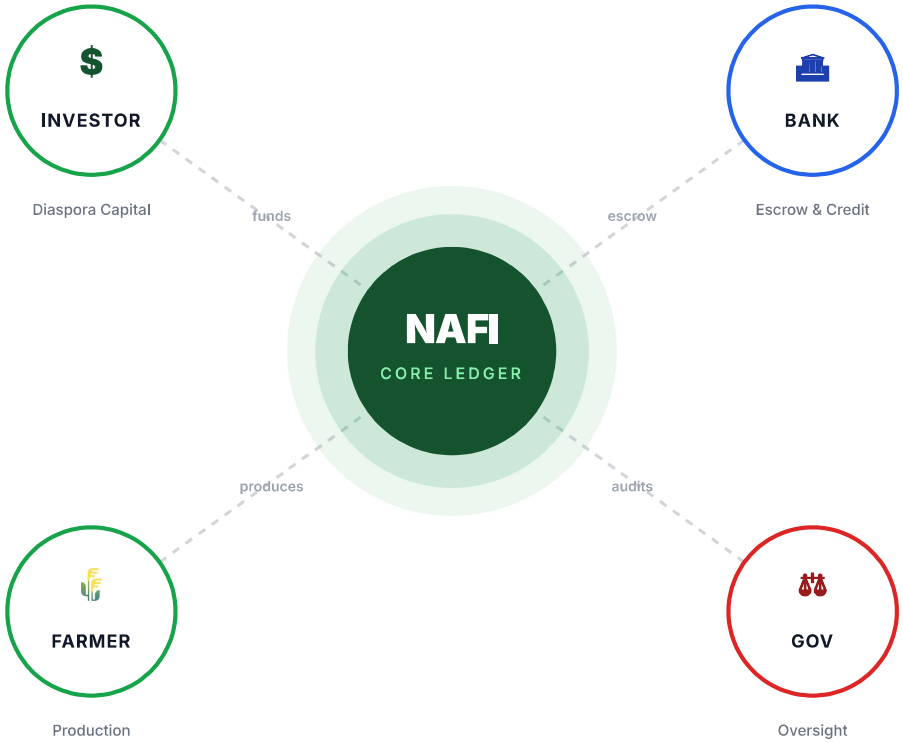

03 BANK

04 REGULATOR

2026

One infrastructure. Every stakeholder. Zero friction.

NAFI is not a bank, a farmer, or an investor. It is the neutral digital rails that allow all four — plus input suppliers and government regulators — to transact through a single shared ledger with automatic, verifiable settlement.

DIASPORA INVESTOR PORTAL

Capital without borders.

A traceable, escrow-protected channel for diaspora Ethiopians to invest in productive agriculture back home — with the transparency of a portfolio app and the safety of a regulated bank.

- ✓ **Browse open contracts**
  See every investment opportunity — crop, region, expected return, and funding progress — in one place.
- ✓ **3-step invest wizard**
  Choose debt or equity, enter your amount, confirm. Two minutes from browse to commitment.
- ✓ **Escrow-protected capital**
  Every birr sits in a regulated bank escrow account until milestones are verified.
- ✓ **Portfolio & returns tracker**
  Live dashboard of every investment, expected return, realized return, and downloadable statement.
- ✓ **Four languages, global access**
  English, Amharic, Oromiffa, and Tigrinya — accessible from any device, anywhere in the world.

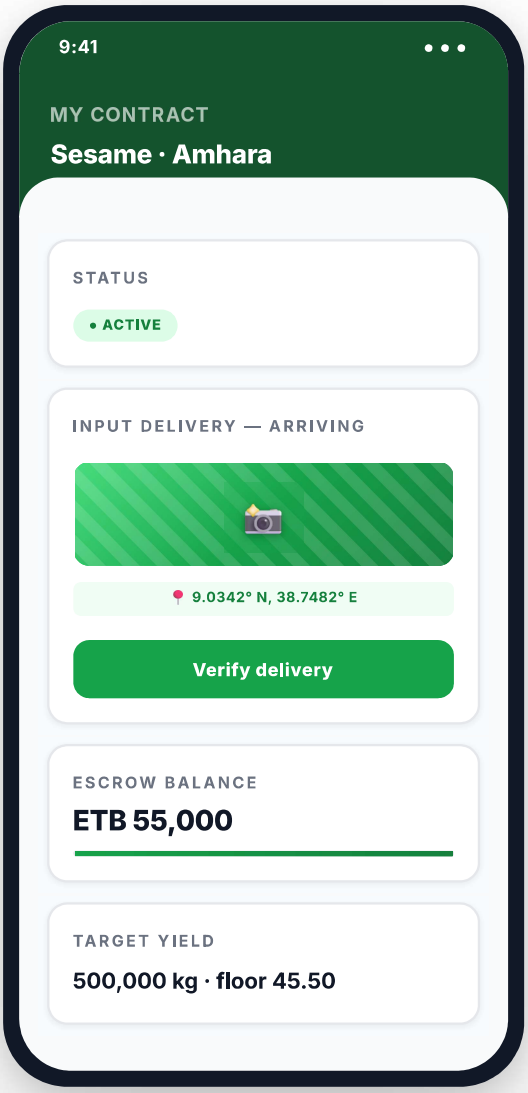

> *"For the first time, my investment in Ethiopia is traceable, auditable, and aligned with national priorities."*
>
> — HANNA G., DIASPORA INVESTOR · WASHINGTON, DC

COMMERCIAL FARMER PORTAL

A contract you can trust. A payment you can see.

A mobile-first workspace built for Ethiopia's rural realities — works offline, in Amharic, on entry-level smartphones, with GPS-verified delivery that unlocks escrow payment the moment goods arrive.

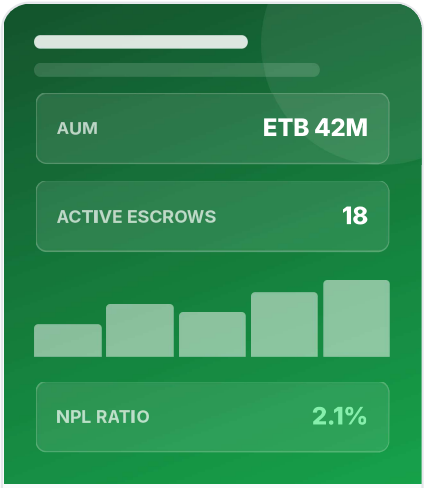

- ✓ **Digital contract signing**
  Type your legal name, confirm your agreement, and sign — compliant with Proclamation 1289/2023.
- ✓ **Offline-first delivery verification**
  Capture photo + GPS evidence with zero connectivity. Syncs automatically when the network returns.
- ✓ **Real-time escrow visibility**
  See exactly how much money is held on your behalf, in real time, with a full transaction ledger.
- ✓ **Input ordering & tracking**
  Order seeds, fertilizer, and machinery from certified suppliers with guaranteed payment on delivery.
- ✓ **Collateral & credit history**
  Register warehouse receipts as collateral and build the credit history that unlocks future lending.

> *"For the first time, my contract is real. I can see the money, I can see the delivery, and I know exactly when I'll be paid."*
>
> — ABEBE B., COMMERCIAL FARMER · AMHARA REGION

Oversight without overhead.

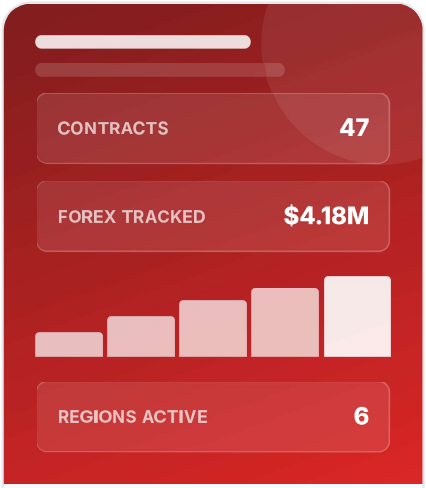

Purpose-built dashboards for the institutions that make agriculture bankable — with real-time visibility into every escrow, contract, and compliance metric, all backed by an immutable audit trail.

Commercial Bank

Escrow management, multi-party release approvals, loan portfolio tracking, and real-time collateral verification.

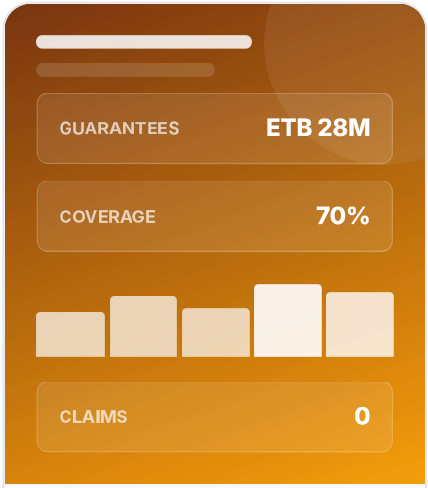

BANKING

Government Regulator

National dashboard with real-time views of contracts, forex flows, credit deployment, and compliance — all on one ledger.

REGULATORY

DBE & NAFA

Co-financing portfolio, RUFIP III tracking, guarantee issuance, and first-loss exposure monitoring.

DEVELOPMENT FINANCE

> *"NAFI gives us the real-time data and escrow controls we need to make agricultural lending safe — and profitable."*
>
> — COMMERCIAL BANK PARTNER · HEAD OF AGRI-FINANCE

Engineered for Ethiopia's realities.

Six technology pillars designed from the ground up for low-connectivity, multi-language, multi-institution environments — while meeting international standards for financial integrity and auditability.

Offline-First PWA

Delivery verifications, contract signatures, and photo evidence work with zero connectivity, then sync automatically.

0 CONNECTIVITY REQUIRED

Four Languages

English, Amharic (አማርኛ), Oromiffa (Afaan Oromoo), and Tigrinya (ትግርኛ) — including Ethiopian calendar support.

FULL I18N COVERAGE

Smart Contracts

Automated settlement based on predefined waterfall priorities. Every distribution executes deterministically.

ZERO MANUAL SETTLEMENT

Multi-Party Escrow

Releases over 1M ETB require approval tokens from a government witness and DBE co-signer — preventing unilateral fraud.

2-OF-3 RELEASE PROTOCOL

Audit Ledger

Every action is hash-chained to the previous entry — tamper is detectable and compliant with Ethiopian financial audit standards.

IMMUTABLE RECORD

Role-Based Access

Twelve distinct roles, each with granular permissions across three enforcement layers: route, component, and API.

12 ROLES · 30+ PERMISSIONS

> *"Built to work in Ethiopia's actual conditions — not the conditions of a Silicon Valley lab."*
>
> — PLATFORM ENGINEERING PRINCIPLE

Two signed contracts. Three thousand hectares. One production-ready platform.

We are pre-revenue but not pre-product. Two signed farmer agreements cover 3,000 hectares across Amhara and Oromia. The entire platform is production-ready. The only thing missing is the first transaction.

2
SIGNED FARMER AGREEMENTS

3,000
HECTARES UNDER CONTRACT

$250K
DIASPORA SOFT COMMITMENTS

✓ **Signed Contracts**
Sesame + coffee · Amhara + Oromia · 2026/27 season · Under Proclamation No. 1289/2023

✓ **Production Platform**
12 role portals · 14 backend modules · offline PWA · 4 languages · audit ledger · JWT auth

• **In Discussion**
DBE co-financing · 3 commercial banks · EIC incentives · NBE sandbox submission next

THREE-PHASE GROWTH PLAN

1 **Prove the Model**
Year 1–2 · 20 farmers · $5M deployed · NBE sandbox graduation

2 **Scale Nationally**
Year 2–3 · 500 farmers · $50M · first Diaspora Bond launch

3 **Regional Expansion**
Year 3–5 · 5,000+ farmers · $500M · entry into Kenya, Uganda, Sudan

GET STARTED

Join the *infrastructure*.
